Main Problems Encountered

Problem 1

Description: Working on the assignment took longer than expected.

Reaction: Extra hard work for this week to get to finish the assignment and the issues in the sprint plan.

Adjustments for the next Sprint
- Sprint plan 1 included all the things the team wanted to do on the long term, which is a mistake. The next sprint will include only sprint-related issues and goals. A note was written next to alll things that were intended to be run in the coming sprints.
- Understand that assignments take a lot of time and plan accordingly.
